How Westminster Works
Blackwell's Non-Fiction Book of the Month

Competitors

Blackwell's website main issues

- There are **two different websites** (and looks like even two online stores) under single domain. Second online stores dedicated to rare books looks rather outdated.
- Website has several **SEO issues** including problems of wrong internal link usage in pages.
- Website analysis showed the website could have **some CSS and JS loading time issues** – improving this could help to improve page ranking.

Blackwell's short-term improvements

- Fix SEO issues – wrong word count, duplicate meta descriptions, wrong title tags, wrong internal link usage
- Fix paid Google keyword advertising with poor titles and without description
- Seek relatively cheap keywords with low paid difficulty and/or moderate SEO difficulty. It is possible to find set of keywords with relevant books to advertise.

Blackwell's long-term improvements

For long-term improvements it is suggested to analyze potential to modernize and improve the website:

- unify all content under single website
- compress CSS, JS and image files to load page faster
- fix technical issues with dynamic links
- improve meta tags and page content management
- Improve image SEO
